SECURY Automatic Door Lock & Lever Handle

Securing technology for you

Ferco lever handle sets are uniquely designed to operate on multipoint door locks. Our handle sets withstand the rigorous everyday operational wear & tear of engaging or disengaging multiple lock points. Our handle sets are designed for long term use!

- Patented handle snap-rings allow for handles to be shipped non-handed. The manufacturer no longer has to worry about ordering left or right, and will save on inventory.
- Handle setscrews to fasten spindles combined with the snap-ring will ensure the handle will stay tight on the door for a long time.
- Self centering 8mm split Spindle to make sure it is always centered into the door.
- Longer Screw ports on escutcheons: Ferco has added an interior sleeve port that will guide the M5 mm screw straight to the opposing exterior screw port.
- Exterior O-ring on handle shaft to prevent water from entering around the exterior handle.
- Washers between handle and escutcheon making sure the handle operation is and remains smooth.
- Escutcheon Foam gasket to prevent air and cold.
- Rubber gasket (Order separately) to prevent air and water leakage around the exterior escutcheon.
- Schlage Cylinder with one tail for both 1 3/4" and 2 1/4" thick doors
- M5 handle set screws to fasten the escutcheons included in every handle set kit.
- Handle above cylinder or handle below cylinder option
- FERCO handle sets available in Solid Brass or economical zinc die-cast material with selections in many plate designs, lever styles and finishes.

- Locking/Unlocking from inside only

Construction Key

Description	Color	PU	Part Number
Construction key	Black	10	9-U0001-01-0-0
* = Color		PU = Packaging Unit	

Additional information

The construction key is available for those who prefer to install the decorative hardware trim and lever sets on doors after the construction has been completed. Installing the escutcheon plates and levers in the final stage of construction prevents the decorative trim from becoming scratched or damaged.

The construction key has been designed to accommodate multipoint door hardware (8mm square), tilt-turn hardware (7mm square) and lift-slide hardware (10mm square).
